*INSTRUCTIONS FOR THE INSTALLER: these are intended for the **qualified technician** who must install the appliance, set it functioning and carry out an inspection test.*

INSTRUCTIONS FOR THE USER: these contain user advice, description of the controls and the correct procedures for cleaning and maintenance of the appliance.

1. INSTRUCTIONS FOR SAFE AND PROPER USE

THIS MANUAL IS AN INTEGRAL PART OF THE APPLIANCE AND THEREFORE MUST BE KEPT IN ITS ENTIRETY AND IN AN ACCESSIBLE PLACE FOR THE WHOLE WORKING LIFE OF THE OVEN. WE ADVISE CAREFUL READING OF THIS MANUAL AND ALL THE INSTRUCTIONS THEREIN BEFORE USING THE OVEN. INSTALLATION MUST BE CARRIED OUT BY QUALIFIED PERSONNEL IN ACCORDANCE WITH THE REGULATIONS IN FORCE. THIS APPLIANCE IS INTENDED FOR DOMESTIC USES AND CONFORMS TO CURRENT **REGULATIONS IN FORCE**. THE APPLIANCE HAS BEEN BUILT TO CARRY OUT THE FOLLOWING FUNCTIONS: **COOKING AND HEATING-UP OF FOOD**. ALL OTHER USES ARE CONSIDERED IMPROPER.
THE MANUFACTURER DECLINES ALL RESPONSIBILITY FOR IMPROPER USE.

DO NOT LEAVE THE PACKING IN THE HOME ENVIRONMENT. SEPARATE THE VARIOUS WASTE MATERIALS AND TAKE THEM TO THE NEAREST SPECIAL GARBAGE COLLECTION CENTRE.

IT IS OBLIGATORY FOR THE ELECTRICAL SYSTEM TO BE EARTHED ACCORDING TO THE METHODS REQUIRED BY SAFETY RULES.

WHEN LINKING UP TO MAINS BY PLUG AND SOCKET, MAKE SURE THAT BOTH ARE COMPATIBLE AND CONNECT BY MEANS OF A POWER CABLE COMPLYING WITH APPLICABLE REGULATIONS.
THE SOCKET MUST BE ACCESSIBLE AFTER THE APPLIANCE HAS BEEN BUILT IN.
NEVER UNPLUG BY PULLING ON THE CABLE.

DO NOT OBSTRUCT VENTILATION OUTLETS AND HEAT DISPERSAL SLITS.

IMMEDIATELY AFTER INSTALLATION CARRY OUT A BRIEF INSPECTION TEST OF THE OVEN, FOLLOWING THE INSTRUCTIONS BELOW. SHOULD THE APPLIANCE NOT FUNCTION, DISCONNECT IT FROM THE SUPPLY AND CALL THE NEAREST TECHNICAL ASSISTANCE CENTRE.
NEVER ATTEMPT TO REPAIR THE APPLIANCE.

ALWAYS CHECK THAT THE CONTROL KNOBS ARE IN THE “ZERO” (OFF) POSITION WHEN YOU FINISH USING THE OVEN.

NEVER PUT INFLAMMABLE OBJECTS IN THE OVEN: THEY COULD BE ACCIDENTALLY CATCH LIGHT AND CAUSE FIRES.

DURING USE THE APPLIANCE BECOMES VERY HOT. TAKE CARE NOT TO TOUCH THE HEATING ELEMENTS INSIDE THE OVEN.

THE I.D. PLATE WITH TECHNICAL DATA, REGISTRATION NUMBER AND BRAND NAME IS POSITIONED VISIBLY ON THE OVEN DOOR FRAME.
THE PLATE MUST NOT BE REMOVED.

THE USE OF THIS APPLIANCE IS NOT PERMITTED TO PEOPLE (INCLUDING CHILDREN) OF REDUCED PHYSICAL AND MENTAL ABILITY, OR LACKING IN EXPERIENCE IN THE USE OF ELECTRICAL APPLIANCES, UNLESS THEY ARE SUPERVISED OR INSTRUCTED BY ADULTS OR PEOPLE RESPONSIBLE FOR THEIR SAFETY.

THIS APPLIANCE IS MARKED ACCORDING TO THE EUROPEAN DIRECTIVE 2002/96/EC ON WASTE ELECTRICAL AND ELECTRONIC EQUIPMENT (WEEE).
THIS GUIDELINE IS THE FRAME OF A EUROPEAN-WIDE VALIDITY OF RETURN AND RECYCLING ON WASTE ELECTRICAL AND ELECTRONIC EQUIPMENT.

BEFORE THE APPLIANCE IS PUT INTO OPERATION, ALL THE LABELS AND PROTECTIVE FILMS APPLIED INSIDE OR OUTSIDE MUST BE REMOVED.

The manufacturer declines all responsibility for damage to persons or things caused by non-observance of the above guidlines or by interference with any part of the appliance or by the use of non-original spares.

2. INSTALLATION

2.1 Electrical connection

Check that the mains voltage and power cable ratings are as per the information provided on the label attached to the oven door frame.
This label must never be removed.

It is obligatory for the electrical system to be earthed according to the methods required by safety rules.

If a plug and socket connection is being used make sure that the plug and socket are compatible. Avoid use of adapters and shunts as these could cause overheating and risk of burns.

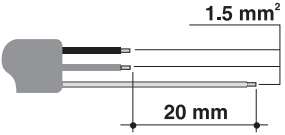

If a fixed connection is being used fit cable line with an omnipolar circuit breaker with a contact opening gap equal to or greater than **3 mm** in an easily accessible position in proximity to the oven.

For operation on 220-240V ~: *use an H05RR-F / H05RN-F type three-core cable (3 x 1.5 mm^2).*

The cable end to be connected to the appliance must be provided with an ground wire (yellow-green) at least 20 mm longer.

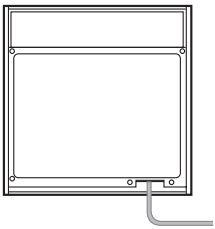

2.1.1 Ovens with hob controls

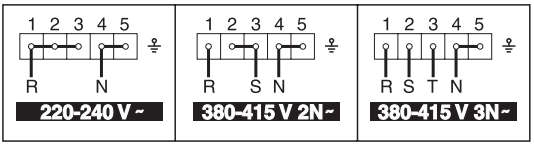

In the ovens with hob controls the **power cable is not supplied**. Use a H05RR-F or H05RN-F rubber-sheathed cable making sure that it does not come into contact with any external metal parts of the oven when routing.

Remove rear cover by loosening relevant screws to gain access to the terminal strip. If necessary change jumper configuration as shown in the diagram and then connect wires making sure that the earth wire is at least 20 mm longer than the others. Secure power cable to oven by means of an appropriate fitting.

Instructions for the installer

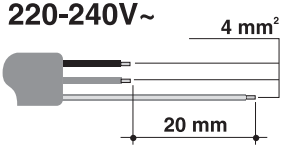

GB-IE

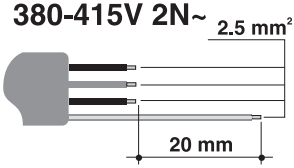

For operation on 220-240V ~: *use an H05RR-F / H05RN-F type three-core cable (3 x 4 mm²).*

220-240V~

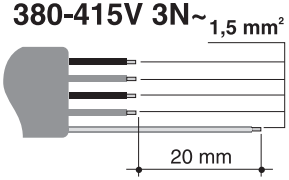

For operation on 380-415V2N~: *use an H05RR-F / H05RN-F type four-core cable (4 x 2.5 mm²).*

380-415V 2N~

For operation on 380-415V3N~: *use an H05RRF / H05RN-F type five-core cable (5 x 1.5 mm²).*

380-415V 3N~

The cable end to be connected to the appliance must be provided with an earth wire (yellow-green) at least 20 mm longer.

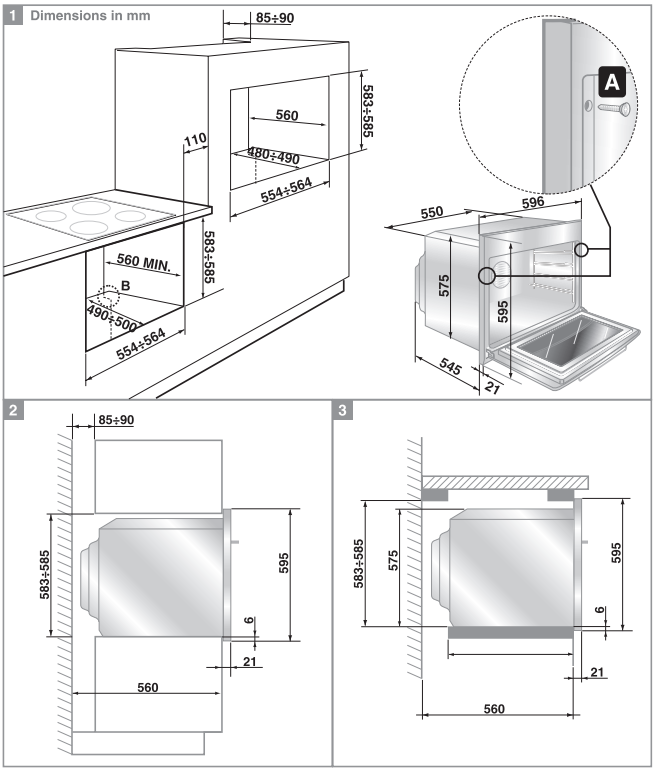

The manufacturer declines all responsibility for damage to persons or things caused by non-observance of the above guidelines or by interference with any part of the appliance.

2.2 Installing the oven

The oven is designed for installation into any piece of furniture as long as it is heat-resistant. Proceed according to the dimensions shown in Figures **1**, **2** and **3**. For installing under a work top, follow the dimensions given in Figure **3**. For installing under a work top beneath a hob with controls connected to the oven, ensure a minimum clearance from any side walls of at least 110 mm as shown in Figure **1**.

For installing in a column, follow the dimensions given in Figure **2** allowing for a clearance of 80 to 90 mm at the top and sides of the column. Tighten the four screws (ref.**A)** inside the frame to secure (Fig. **1**).

For installing beneath a separate hob, allow for a rear and bottom clearance as shown in Figure **1** (ref. **B**). See relevant instructions for fitting and securing the hob.

Never use the oven door to lever the oven into place when fitting.
Avoid exerting too much pressure on the oven door when open.

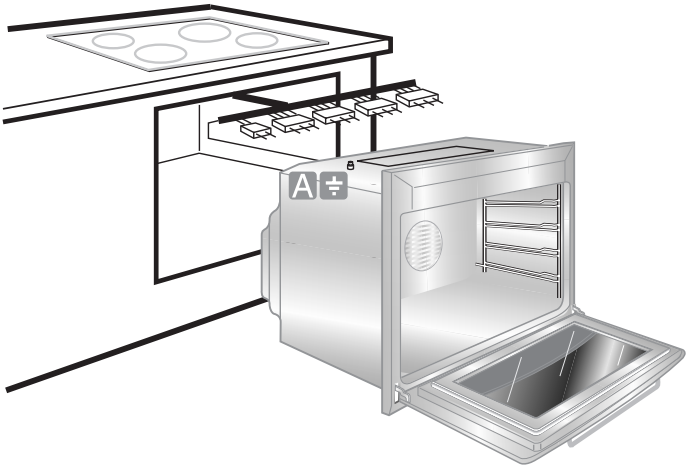

2.3 Connecting the hob to the oven

Once installed, the hob must be connected to the oven. Install the oven allowing enough room for the following operations to take place.

- Connect the earth wire (yellow-green) of the hob to the earth terminal **A** of the oven (see figure).
- Fit the hob connectors into the appropriate sockets in the top cover of the oven. Make sure that the colours and symbols of the connectors match those of the oven sockets.
- If the hob is equipped with a connector for the residual heat indicator, this must be fitted into the free socket on the right handside.

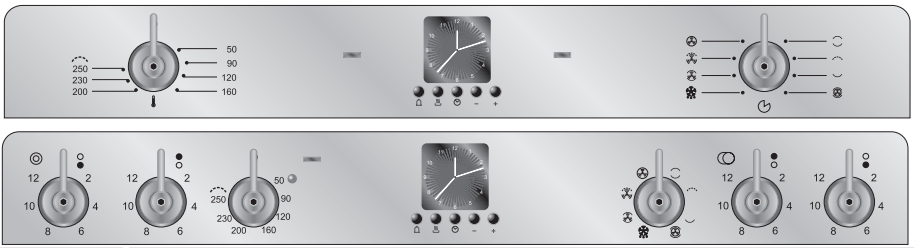

The oven can now be fully mounted into the cabinet; make sure that the power cable is properly routed and does not come into contact with parts which may become hot during operation.

3. DESCRIPTION OF CONTROLS

3.1 Front control panel

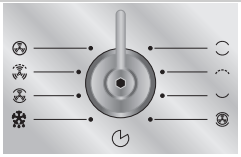

All the oven controls are grouped together on the front panel.

The user has only to press the central key ⊙ for 1 - 2 seconds to enable use of the oven on first use or after a power blackout.

FUNCTION CONTROL KNOB

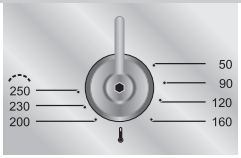

Rotate the knob in either direction to select desired function from the following:

	NO FUNCTION SET
	UPPER AND LOWER HEATING ELEMENT
	GRILL ELEMENT
	LOWER HEATING ELEMENT
	UPPER AND LOWER HEATING ELEMENT + VENTILATED HEATING ELEMENT
	DEFROSTING
	UPPER AND LOWER HEATING ELEMENT + VENTILATION
	FULL GRILL ELEMENT + VENTILATION
	VENTILATED HEATING ELEMENT

THERMOSTAT CONTROL KNOB

Cooking temperature is selected by turning the knob clockwise to the desired setting, between **50**° and **250**°C.

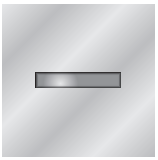

THERMOSTAT INDICATOR LIGHT (ORANGE)

When this light comes on, the oven is heating up.
When this light goes out, the preset heating temperature has been reached.
When the light flashes, the temperature inside the oven is steady.

PILOT LIGHT (GREEN)

This light comes on when any of the oven elements is receiving power.

HOB CONTROL KNOB

Permits to adjust cook top heating. Rotate clockwise to set to desired value (**2** to **12**).

HOB CONTROL KNOB WITH DUAL ZONES

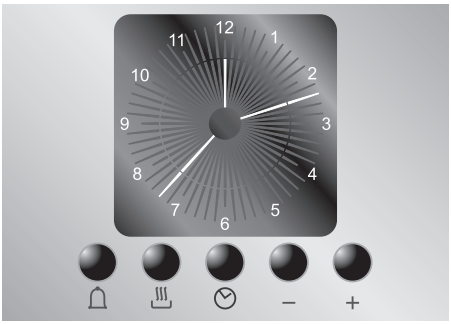

Used to select heating zone in plates with dual heating zones.

Rotating the knob clockwise from between **2** to **12** heats the inner zone within the small diameter.
Setting knob to ◎ or ⊂⊃ and releasing it (knob returns to **12**) causes both zones to be heated. To adjust heat intensity, turn the knob anticlockwise to the desired value.
To return to heating inside the inner zone only, set knob first to **0** and then to any value between **2** and **12** as desired.

3.2 Electronic Analogue Clock

LIST OF FUNCTIONS

MINUTE-MINDER BUTTON

AUTOMATIC SWITCH-OFF TIMING BUTTON

TIME SETTING AND RESET

VALUE DECREASE BUTTON

VALUE INCREASE BUTTON

3.2.1 Setting the time

When the oven is used for the first time, or after a power blackout, the display flashes on and off at regular intervals. Press the key for 1/2 seconds to stop the display flashing and start setting of the current time.
Press the value modification keys – or + to increase or decrease by one minute for each time a key is pressed.
Press one of the two value modification keys until the current time appears. The clock will start from the time set 6/7 seconds after the last key is pressed.

At the end of each programmed cooking operation, the clock gives 8 beeps, repeated 3/4 times at intervals of about 1 and a half minutes. The beeps can be stopped at any moment by pressing any key.

3.2.2 Minute-minder

This function does not stop cooking but just triggers the beeps.

- When the key is pressed the display illuminates, appearing as shown in figure 1;
- Press the + or − keys within 6/7 seconds to set the minute-minder. Whenever a key is pressed, 1 outside segment, representing 1 cooking minute will light up (figure 2 shows 10 cooking minutes).
- The countdown will start 6/7 seconds after the last key is pressed; at the end of it, you will hear the beeps.
- During cooking with countdown, the current time can be displayed by pressing the key once; press again to return to the minute-minder display.
- **At the end of the countdown, the oven has to be switched off by hand, by turning the thermostat and the function selector to 0.**

1

2

3.2.3 Programming

Cooking duration time: the 2nd button can be used to set the cooking time. Before setting it, turn the thermostat to the cooking temperature of choice and the function selector knob to any setting. To set the cooking time, proceed as follows:

1

2

- Press the key for 1/2 seconds; the pointer will move to position 12 (Fig. 1).
- Use the − and + keys to set the cooking time; whenever the + key is pressed, 1 minute will be added to the cooking time, and every 12 minutes a new inside segment will light up (figure 2 shows a cooking time of 1 hour).
- Once the required time has been set, cooking will start about 6 seconds after the last time the − or +. key is pressed.
- Once cooking has started, the display will show the current time, represented by the constantly on segments, and the minutes left until cooking finishes, represented by the flashing segments (every flashing segments indicates 12 minutes of cooking time left).
- When the end of the cooking time is reached, the timer will switch off the oven heating elements, the beeps will start and the numbers on the dial will flash.
- The cooking time can also be reset by deleting the program set; pressing the central key for 1 or 2 seconds will delete the time set and the oven will have to be switched off by hand.

Caution: cooking times of more than 6 hours cannot be set.

Cooking start: as well as setting a cooking duration time, the user can also set the cooking start time (up to 12 hours after the current time). To set the cooking start/end time, proceed as follows.

- Set the cooking duration time as described in the previous point.
- Within 6/7 seconds after the last time the − or + keys are pressed, press the key to set the cooking start time. The display will show the current time with the inside segments indicating the cooking end time illuminated. Use the − and + keys to set the cooking start time.
- 6/7 seconds after the last time a key is pressed, the display will show the current time and the cooking start and end times, indicated by the illuminated inside segments. The segments on the display will be constantly on until the current time is the same as the cooking start time; as soon as the current time reaches the cooking start time set, all the inside segments will start to flash, indicating that the oven has started cooking.
- When the end of the cooking time is reached, the timer will switch off the oven heating elements, the beeps will start and the numbers on the dial will flash.
- To reset the entire program set, keep the central key pressed for 1 or 2 seconds**:** if cooking has already started the oven will have to be switched off by hand.
- The image on the right shows an example of programming: the current time is 7.06 and cooking is programmed to start at 8 o'clock and finish at 9.
- At 8 o'clock, the inside segments between 8 and 9 will start to flash and the hour pointer will remain still.

Caution: for the oven to start cooking after the programming procedure just described, the thermostat and function selector must be properly set on the temperature and function required.

3.2.4 "DEMO" Function

Models with analogue/digital programmer feature a "DEMO" function which deactivates the heating elements while leaving the other functions unchanged. To activate it, simply press the , −, and + keys and keep them held down for 3-4 seconds. A confirmation buzzer will inform the user that the function is active. When the “DEMO” function is active, the number 6 on the clock flashes at regular intervals. To deactivate it, simply repeat the same procedure.

4. USE OF THE OVEN

The user has only to press the central key ⊙ for 1 - 2 seconds to enable use of the oven on first use or after a power blackout.

4.1 Warnings and general advice

Before using the oven for the first time, pre-heat it to maximum temperature (**250**°C) long enough to burn any manufacturing oily residues which could give the food a bad taste.

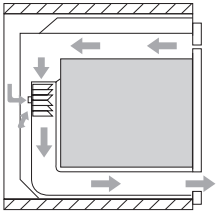

During cooking, do not cover the bottom of the oven with aluminium or tin foil and do not place pans or oven trays on it as this may damage the enamel coating. If you wish to use greaseproof paper, place it so that it will not interfere with the hot air circulation inside the oven.

To prevent any steam in the oven creating problems, open the door in two stages: half open (5 cm approx.) for 4-5 seconds and then fully open. To access food, always leave the door open as short a time as possible to prevent the temperature in the oven from falling and ruining the food.

4.2 Cooling system

The oven features cooling fan which switch on together with the oven.
Fan operation causes a normal flow of air which exits at the bottom part of the oven front which may continue for a brief period of time even after the oven has been turned off.

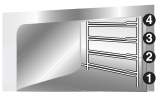

4.3 Oven light

It comes on when the function switch knob is turned to any position.

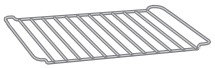

5. AVAILABLE ACCESSORIES

The oven features **4 support** positions for shelves and pans of different height.

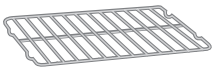

Some models do not feature all accessories.

Chrome shelf: useful for holding cooking vessels.

Grill mesh: for placing above grill pan to allow juices to drip into pan below .

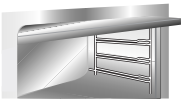

Roasting/Grill pan: to be used for roasting or grilling.

Enamel tray: for baking cakes, pizza and oven desserts.

Roof liner/Grill guard: removing this simplifies cleaning procedures inside the oven.

Chromium-plated handle: for removing hot shelves and pans from the oven. Be sure to wear oven gloves when in use.

Accessories available on request
Original accessories may be ordered from any Authorised Service Centre.

6. COOKING HINTS

In fan-assisted mode preheating should be carried out at 30/40°C above the cooking temperature. This considerably shortens cooking times and reduces power consumption, as well as giving better cooking results.

Keep the oven door closed during cooking

6.1 Traditional cooking (multifunction models)

FUNCTION SWITCH	
THERMOSTAT SWITCH	**50 ÷ 250°C**

This traditional cooking method, in which heat comes from above and below, is suitable for cooking food on a single level. You have to pre-heat the oven until the set temperature is reached. Place the food in the oven only after the thermostat indicator light has turned off. very fatty meats may be put in when the oven is still cold. Put frozen meat in immediately, without waiting for it to thaw. The only precaution you need to take is to set the temperature about 20°C lower and cooking time about 1/4 longer than you would for fresh meat.

6.2 Fan cooking (multifunction models)

FUNCTION SWITCH	
THERMOSTAT SWITCH	**50 ÷ 250°C**

This system is suitable for cooking on several levels, including different types of food (fish, meat etc.), without the tastes and smells mingling. Air circulation in the oven ensures a uniform distribution of heat.

Multiple cooking is possible as long as the cooking temperature of the different foods is the same.

6.3 Grill cooking

FUNCTION SWITCH	
THERMOSTAT SWITCH	250

Permits rapid browning of foods. You are advised to place the pan in the highest position. When cooking small items for a short time the pan should be in the highest position. For larger items requiring longer cooking times, the pan should be lowered to avoid food being burned on top before being throughly cooked.
Grill function must be used only with the door closed.

6.4 Fan grilling (multifunction models)

FUNCTION SWITCH	
THERMOSTAT SWITCH	**200**

Ensures uniform heat distribution with greater heat penetration into the food. Food will be lightly browned on the outside and remain soft inside.
Keep the oven door closed during cooking. Heating up time must not exceed 60 minutes.

6.5 Delicate cooking (in some models only)

FUNCTION SWITCH	
THERMOSTAT SWITCH	**50 ÷ 250°C**

Ideal for pastries and cakes with a liquid surface and little sugar and moist desserts in moulds. Excellent results can also be achieved in completing cooking at the base and with dishes requiring heat in the lower area in particular. The pan is best inserted in the lowest position.

6.6 Defrosting (multifunction models)

FUNCTION SWITCH	
THERMOSTAT SWITCH IN POSITION	**0**

The flow of air produced by the fan ensures quicker defrosting.
The air circulating inside the oven is at room temperature.

The advantage of defrosting at room temperature is that it does not alter the taste and appearance of the food.

6.7 Recommended cooking table

Cooking times, especially meat, vary according to the thickness and quality of the food and to consumer taste.

TRADITIONAL COOKING

	SHELF POSITION (1 IS LOWEST)	TEMPERATURE (°C)	TIME IN MINUTES (*)
FIRST COURSES			
LASAGNE	2 - 3	210 - 230	30

PARADISE CAKE	2 - 3	150 - 160	65

7. CLEANING AND MAINTENANCE

Before carrying out any maintenance, switch off the power supply to the machine.

7.1 Cleaning stainless steel

To keep stainless steel in good condition it should be cleaned regularly after use. Let it cool first.

7.1.1 Ordinary Daily Cleaning

To clean and preserve the stainless steel surfaces, always use **only** specific products that do not contain abrasives or chlorine-based acids.
How to use: pour the product on a damp cloth and wipe the surface, rinse thoroughly and dry with a soft cloth or leather.

7.1.2 Food stains or residues

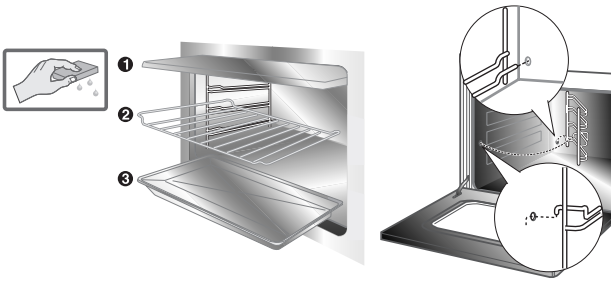

Do not use metallic sponges or sharp scrapers: they will damage the surface.
Use normal non-abrasive products for steel, and a wooden or plastic tool if necessary.
Rinse thoroughly and dry with a soft cloth or leather.
Do not allow residues of sugary foods (such as jam) to set inside the oven. If left to set for too long, they might damage the enamel lining of the oven.

7.2 Cleaning of the oven (without self-cleaning panels)

For best oven upkeep clean regularly after having allowed to cool. Take out all removable parts.

- Clean the oven grill and side guides with hot water and non-abrasive detergent. Rinse and dry.
- The oven should be operated at the maximum temperature for about 15/20 minutes after using specific products, to eliminate the residues deposited inside the oven.
- For easier cleaning, the door can be removed (see P. 8.2)

7.3 Self-cleaning liners (only on some models)

The oven is equipped with continuous self-cleaning enamelled liners.
These liners make the oven easier to clean and ensure its efficiency over time.

7.3.1 Using the self-cleaning liners

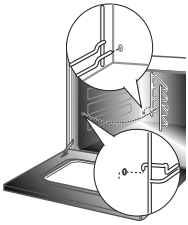

Periodically, to prevent food residues and unpleasant smells from accumulating inside the oven, the appliance should be operated empty at temperatures of not less than 200°C for a time varying from 30 to 60 minutes, in order to allow the self-cleaning liners to oxidise the residues present; when the oven has cooled, these will then be removed with a damp sponge

7.3.2 Looking after the self-cleaning liners

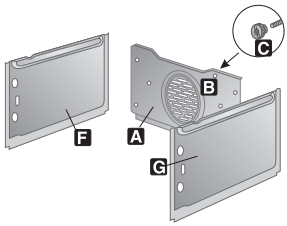

The liners should not be cleaned with abrasive creams or ordinary detergents. Use a damp sponge only, so as not to damage the special characteristics of the enamel which coats the liners.

7.3.3 Assembling the self-cleaning liners

1. Remove all accessories from the oven;
2. Remove the side supports (fig.1);
3. Extract the side liners “F” and “G”(fig. 2);
4. Remove the back panel “A” after undoing the threaded ring-nut “C” (fig. 2).
5. Reassemble the panels, restoring them to their original position. Incorrect installation of the rear panel can lead to uneven cooking.

1)

2)

7.4 Door glass

The door glass should always be kept clean. Use absorbent kitchen paper to clean. In case of tough spots, clean with a damp sponge using regular detergent.

8. ADDITIONAL MAINTENANCE

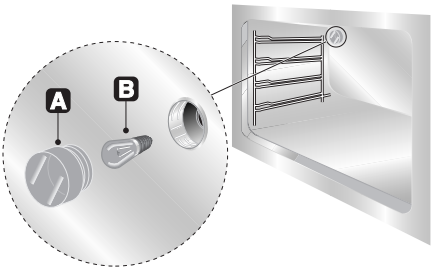

The oven may require additional maintenance or replacement of parts subject to wear such as seals, bulbs, and so on. The following instructions describe how to carry out these minor maintenance operations.

Before any intervention, disconnect the power supply.

8.1 Replacement of light bulb

Remove the bulb protector **A** by turning anticlockwise and change bulb **B** (in the 8-function model with front glass panel change the halogen bulb **C**) with a similar one. Re-fit the bulb protector **A**.

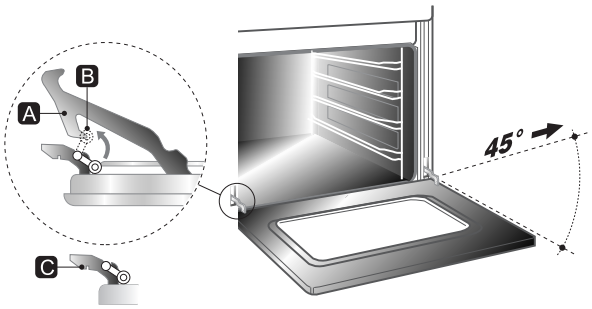

Only use oven bulbs (T 300°C).

8.2 Removing the door

Raise levers on each hinge **A** to lock the hinges before attempting to remove the door. Hold the door on both sides with both hands near hinges **B**. Lift up the door forming an angle of about 45° and remove. To refit, slide the hinges **A** into slots in oven frame. Locate the grooves (figure C) over frame of oven in hinge cut out, lower the door and release the locking levers (figure B).

8.3 Oven door seal

To permit thorough cleaning of the oven, the seal may be removed. Before removing the seal, take off the door as described above. Once the door has been taken off, lift the tabs at the corners as shown in the figure.

After cleaning, refit the seal with the longer side horizontal and insert the tabs into the appropriate holes starting from the top ones.
